APSCHE

(A STATUTORY BODY OF GOVERNMENT OF ANDHRA PRADESH)

PROGRAM BOOK FOR
SEMESTER INTERNSHIP

Name of the Student: N. yeswanth

Name of the College: Government degree college, Rajampet

Registration Number: 216080054012

Period of Internship: From: 01/02/2024 To: 01/05/2024

Name & Address of the Intern Organization :- Dixon Technologies, Tirupati
517501, Andhra Pradesh

University
YEAR

An Internship Report on

DIXON TECHNOLOGIES

(Title of the Semester Internship Program)

Submitted in accordance with the requirement for the degree of

B-SC [M.S-C.S]

Under the Faculty Guideship of

K. S. KHAR BABU

(Name of the Faculty Guide)

Department of

MATHEMATICS

(Name of the College)

Submitted by:

N. Yeswanth

(Name of the Student)

Reg.No: 216030054019

Department of MATHEMATICS

Government Degree College, Rajampet.

(Name of the College)

Instructions to Students

Please read the detailed Guidelines on Internship hosted on the website of AP State Council of Higher Education <https://apsche.ap.gov.in>

1. It is mandatory for all the students to complete Semester internship either in V Semester or in VI Semester.
2. Every student should identify the organization for internship in consultation with the College Principal/the authorized person nominated by the Principal.
3. Report to the intern organization as per the schedule given by the College. You must make your own arrangements for transportation to reach the organization.
4. You should maintain punctuality in attending the internship. Daily attendance is compulsory.
5. You are expected to learn about the organization, policies, procedures, and processes by interacting with the people working in the organization and by consulting the supervisor attached to the interns.
6. While you are attending the internship, follow the rules and regulations of the intern organization.
7. While in the intern organization, always wear your College Identity Card.
8. If your College has a prescribed dress as uniform, wear the uniform daily, as you attend to your assigned duties.
9. You will be assigned a Faculty Guide from your College. He/She will be creating a WhatsApp group with your fellow interns. Post your daily activity done and/or any difficulty you encounter during the internship.
10. Identify five or more learning objectives in consultation with your Faculty Guide. These learning objectives can address:
 - a. Data and Information you are expected to collect about the organization and/or industry.
 - b. Job Skills you are expected to acquire.
 - c. Development of professional competencies that lead to future career success.
11. Practice professional communication skills with team members, co-interns, and your supervisor. This includes expressing thoughts and ideas effectively through oral, written, and non-verbal communication, and utilizing listening skills.
12. Be aware of the communication culture in your work environment. Follow up and communicate regularly with your supervisor to provide updates on your progress with work assignments.

13. Never be hesitant to ask questions to make sure you fully understand what you need to do your work and to contribute to the organization.
14. Be regular in filling up your Program Book. It shall be filled up in your own handwriting. Add additional sheets wherever necessary.
15. At the end of internship, you shall be evaluated by your Supervisor of the intern organization.
16. There shall also be evaluation at the end of the internship by the Faculty Guide and the Principal.
17. Do not meddle with the instruments/equipment you work with.
18. Ensure that you do not cause any disturbance to the regular activities of the intern organization.
19. Be cordial but not too intimate with the employees of the intern organization and your fellow interns.
20. You should understand that during the internship programme, you are the ambassador of your College, and your behavior during the internship programme is of utmost importance.
21. If you are involved in any discipline related issues, you will be withdrawn from the internship programme immediately and disciplinary action shall be initiated.
22. Do not forget to keep up your family pride and prestige of your College.

Student's Declaration

I, NALLABALLE YESWANTH a student of B.Sc [MScs]
Program, Reg. No. 216030054012 of the Department of MATHEMATICS
College do hereby declare that I have completed the mandatory internship
from 01/02/2024 to 01/05/2024 in DIXON PVT. LTD (Name of
the intern organization) under the Faculty Guideship of
K. SEKHAR BABU (Name of the Faculty Guide), Department of
MATHEMATICS, GOVERNMENT DEGREE COLLEGE, RAJAMPET
(Name of the College)

N. yeswanth
(Signature and Date)

Official Certification

This is to certify that NALLABALLE YESWANTH (Name of the student) Reg. No. 216030054012 has completed his/her Internship in DIXON PUT LTD (Name of the Intern Organization) on PRODUCTION F.A (Title of the Internship) under my supervision as a part of partial fulfillment of the requirement for the Degree of B^{TECH} BSC [MSCS] in the Department of GOVT. DEGREE COLLEGE (Name of the College).

This is accepted for evaluation.

(Signatory with Date and Seal)

Endorsements

Faculty Guide

Head of the Department

Principal

Certificate from Intern Organization

This is to certify that NALLABALLE YESWANTH (Name of the intern)
Reg. No 216030054012 of GOVT DEGREE COLLEGE (Name of the
College) underwent internship in DIXON TECHNOLOGIES (Name of the
Intern Organization) from 01/02/2024 to 01/05/2024

The overall performance of the intern during his/her internship is found to be
Satisfactory (Satisfactory/Not Satisfactory).

Authorized Signatory with Date and Seal

ACKNOWLEDGEMENTS

First I would like to Thank contractor of Dixon technologies Pvt, LTD, giving me the opportunity to do an internship within the organization.

I also would like all the people that worked along with me Dixon Pvt, LTD, Thirupathi with their patience and openness they created an enjoyable working environment. It is indeed with a great sense of pleasure and immense sense of gratitude that I acknowledge the help of these individuals.

I am highly indebted to Principal B. Purushotham sir. for the facilities provided to accomplish this internship.

I would like to thank my Head of the Department sir for this constructive criticism throughout my internship.

I would like to thank internship mentor department of mathematics for their support and advices to get and complete internship.

I am extremely great full to my department staff members and friends who helped me in successful completion of this internship.

CHAPTER 1: EXECUTIVE SUMMARY

The internship report shall have only a one-page executive summary. It shall include five or more Learning Objectives and Outcomes achieved, a brief description of the sector of business and intern organization and summary of all the activities done by the intern during the period.

This report is a detailed overview of my internship journey at Dixon Technologies P.LTD in Thirupur. During my Internship I have learned a lot about communication and working experience with the company, manufacturing, International selling and it's different applications. I have known about the Import and export. I have to learn to work in TV manufacturing process. It not only enriched me professionally but also helped me grow personally as well. My contribution was appreciated by my supervisor and other members of the department. The career path I would be selectively for myself is quite influenced from my Internship. How ever, This my level best to make it meaningful by reflecting my works at the Dixon Technologies P.LTD. I have summarized my overall experience with my learning and challenges faced as an intern.

CHAPTER 2: OVERVIEW OF THE ORGANIZATION

Suggestive contents

- A. Introduction of the Organization
- B. Vision, Mission and Values of the Organization
- C. Policy of the Organization, in relation with the intern role
- D. Organizational Structure
- E. Roles and responsibilities of the employees in which the intern is placed.
- F. Performance of the Organization in terms of turnover, profits, market reach and market value.
- G. Future Plans of the Organization.

Dixon Technologies Pvt Ltd, is a unlisted private company incorporated on 08 February, 2017. It is classified as a private company and it is located in Gautam Buddha Nagar, UP. Its authorized share capital is INR 27.00 and the total paid-up capital is INR 19.00.

"To emerge as the largest and most cost effective complete solution provider for consumer electronics, home appliances, lighting electronics, mobile phone sectors for the domestic and international market." ever since its inception Dixon is driven by its vision. The group has carved a firm place for itself at the forefront of electronic manufacturing and services industry in India. Clearly defined missions have helped Dixon retain its clients for electronics manufacturing services in India and globally.

Minimum Salary in Dixon Technologies depends on the role of the role of you are applying. They need to explore more products through all over the world.

CHAPTER 3: INTERNSHIP PART

Description of the Activities/Responsibilities in the Intern Organization during Internship, which shall include - details of working conditions, weekly work schedule, equipment used, and tasks performed. This part could end by reflecting on what kind of skills the intern acquired.

There is 7 benefits that we gain from doing an internship.

1. Gain valuable work experience.

Companies are often willing to train interns, giving them a viable avenue to a full time position.

2. Decide if this is the right career for you.

confirm if the industry and company is the right fit for you and what you really want to be doing, without making a long term commitment.

3. Networking opportunities.

Meet people in your field who can help you land a full time job, teach you about new business opportunities, or serve as a reference for future applications.

4. Gain an advantage in the job market.

Having relevant, professional work experience on your resume will help you stand out from other applicants.

5. Transition into a job.

Internship can give you valuable insight into what working a full-time position at a company would be like.

6. Apply classroom knowledge.

You have the chance to use the skills you learned in the classroom in a real-world setting.

7. Gain confidence:- Experience in your industry will give you confidence and help you secure that first job.

ACTIVITY LOG FOR THE FIRST WEEK

DAY & DATE	BRIEF DESCRIPTION OF THE DAILY ACTIVITY	LEARNING OUTCOME	Person In-charge Signature
Day - 1	I Visit the company and Introduced my self to the contractor.	Introduction	slt
Day - 2	To day contractor Introduced me to the HR Nishak Sir and I did some Paper work To Join in the company.	Meeting with H.R.	slt
Day - 3	Today supervisor Explained the whole manufacturing process of the L.E.D.T.V.	Know about the manufacturing process.	slt
Day - 4	In this company the raw materials emprotog from different from other countries.	Improtog of raw materials.	slt
Day - 5	To day we saw the entire company and In this company there are a sheds.	Visiting of sheds.	slt
Day - 6	In that a sheds two sheds are using for logistics and 7 sheds are used for manufacturing process.	Logistics products.	slt

WEEKLY REPORT

WEEK - 1 (From Dt..... to Dt.....)

Objective of the Activity Done:

Detailed Report:

Tryning process

In this 1st week I visit the company Dixon P. LTD. In this company they are provide a contracter for the Interchip program. The contracter that he will introduce his self to us, and tie will introduce explain that How to start the Interchip program in the company. we can get on meeting with H.R. Ashok Kumar Sir he will explain about the company formation finally I did some paper work to join in the company for my 3rd semester Interchip program. we visit the entire company, we know that the Dixon company was manufacturing T.V.s. In that meeting they will explain the safety problems. and their company information and also life policy for the employees. we can know the maximum salary the provides for employee.

ACTIVITY LOG FOR THE SECOND WEEK

DAY & DATE	BRIEF DESCRIPTION OF THE DAILY ACTIVITY	LEARNING OUTCOME	Person In-charge Signature
Day - 1	In that 7 sheds different one manufacturing different types of company T.V.s.	Different types of company TVs.	set
Day - 2	I visit the store room that the imported raw materials are stored in there	about the store	set
Day - 3	To know the motive of the organisation.	Intention of the organisation	set
Day - 4	To know the process of production.	How to Produce the goods	set
Day - 5	To Produce the goods how to convert raw materials the machinery.	To insert the raw materials in the machinery.	set
Day - 6	To convert the raw materials into goods	How to convert the raw materials into finished goods	set

WEEKLY REPORT

WERK - 2 (From Dt..... to Dt.....)

Objective of the Activity Done:

Detailed Report:

Information about organization

This week we make report for the company structure. In this entire company they are 10 sheds. In these sheds some sheds are used for manufacturing process and some sheds are used for storage. In this company they are manufacturing different types of company TVs. In some sheds they store the product to transfer. The products are transferred in boxes. We visit the store rooms also. In that store room the imported raw materials are stored. In there we know about the stores. In T.V. manufacturing process the raw materials are imported from different places and converted into products. To know the motive organization.

ACTIVITY LOG FOR THE THIRD WEEK

DAY & DATE	BRIEF DESCRIPTION OF THE DAILY ACTIVITY	LEARNING OUTCOME	Person In-charge Signature
Day - 1	senior staff are explaining about the company and the working process.	class for the working process in the company.	self
Day - 2	In this company they are manufacturing L.E.D T.V.s.	manufacturing products.	self
Day - 3	1) INI 4) LOYO 7) Samsung 2) VU 5) PHILIPS 8) Tashiba 6) PANASONIC. 3) HISENSE. 9) DELL	manufacturing different companies T.V.s.	self
Day - 4	They are providing life Insurance for the employees for any accident.	safety problems that is providing in the company	self
Day - 5	In this manufacturing process the raw materials are imported from different places.	Importance process.	self
Day - 6	Imported goods are converted into final products and the products are export to other states and countries.	Export process.	self

WEEKLY REPORT

WEEK - 3 (From Dt..... to Dt.....)

Objective of the Activity Done:

Detailed Report:

Types of companies TV's manufacturing

This week we know about the T.V. companies and working process. In this company they are manufacturing L.E.D. T.V's different type of companies are contract with the company to manufacture there T.V.s.

In this company they are a T.V. companies are making T.V's with the company they are:-

- | | | |
|------------|--------------|------------|
| 1) MI | 4) WARD | 7) Samsung |
| 2) VU | 5) PHILIPS | 8) Tashiba |
| 3) HISENSE | 6) PANASONIC | 9) BELL |

This company's are contract with the Dixon Company for some particular year's. The facilities that company provided to the employees like food facilities, health facilities, and some policy for any accident are death.

This made the employees to work properly.

ACTIVITY LOG FOR THE FOURTH WEEK

DAY & DATE	BRIEF DESCRIPTION OF THE DAILY ACTIVITY	LEARNING OUTCOME	Person In-charge Signature
Day - 1	T.V Panel typically refers to the display screen of a Television. The panel is the part of the T.V.	Panel Inspection	slt
Day - 2	T.V. panels come in various sizes. ranging from small displays suitable.	Range of T.V panel	slt
Day - 3	T.V. panels will come in different sizes that are 32, 43, 55, 65, 75, 100 Inches.	sizes of T.V. Panel	slt
Day - 4	T.V. electronic components assemble.	Assembling	slt
Day - 5	The back cover of a T.V. is attached with screws and clips.	Fixing of Back cover	slt
Day - 6	manufacturers will typically have specific quality control process.	fixing of Back cover.	slt

WEEKLY REPORT

WEEK - 4 (From Dt..... to Dt.....)

Objective of the Activity Done:

Inspection of T.V panel

Detailed Report:

This week we know about the T.V panel inspection. T.V. panel typically refers to the display screen of a television. physical inspection may involve looking for defect in the panel must be free from any physical imperfections that may affects performance or appearance.

Functional inspection involves testing the panel's display quality, brightness, color accuracy, contrast ratio, and other performance metrics.

The panel must meet certain standards for each of these metrics in order to ensure that the final product meets customer expectations.

Overall, T.V Panel inspection is an important part of the manufacturing process to ensure that the final product meets quality standards and provides a high-quality viewing experience for consumers.

ACTIVITY LOG FOR THE FIFTH WEEK

DAY & DATE	BRIEF DESCRIPTION OF THE DAILY ACTIVITY	LEARNING OUTCOME	Person In-charge Signature
Day - 1	The T.V classis will need to be prepared for the power word attachment	preparing the T.V. classis	st
Day - 2	onces the classis is ready The power cord will be Corneved to the T.V.	connecting the power cord	st
Day - 3	After the power cord is attached the connecting is need to be tested to ensure.	testing the connecting	st
Day - 4	once the power cord connection have been tested & verified the T.V. classis will be closed up.	Finalyssing the assembly	st
Day - 5	depen ding on how the TV is Fixed in the input side you may need different tools.	using proper tools for fixing.	st
Day - 6	T.V. Physically Fixed in input side.	T.V. Input side.	st

WEEKLY REPORT

WEEK - 5 (From Dt..... to Dt.....)

Objective of the Activity Done:

Preparing of different chassis

Detailed Report:

To preparing a T.V. chassis the T.V. chassis will need to be prepared for the power cord attachment, once the chassis is ready the power cord will be connected to the T.V. After the power cord is attached to connecting is need to be tested to ensure.

Steps:-

- * Insure that the T.V. set is plugged into a power source and turned on.

- * Use the remote control to navigate to the desired T.V. channel or program.

Some tips for a better T.V. viewing experience

- * Choose a comfortable viewing location and adjust the lighting to reduce glare

- * Take breaks if watching for an extended period to avoid eye strain.

- * Experiment with different picture and sound settings to find the best configuration.

ACTIVITY LOG FOR THE SIXTH WEEK

DAY & DATE	BRIEF DESCRIPTION OF THE DAILY ACTIVITY	LEARNING OUTCOME	Person In-charge Signature
Day - 1	The power-on condition of agging is minutes.	Agging	Alt
Day - 2	The agging process is used to verify the problems and show them.	Verifying problems in agging	Alt
Day - 3	Testing is another Important process in manufacturing of T.V.s.	Testing	Alt
Day - 4	HDMI is the Hidesimation multimedia interface It is an all digital Audio video transmit information.	Testing HDMI Hidesimation multimedia inter face	Alt
Day - 5	Local area Network is a computer that covers a small are typically within a single campus.	Testing LAN	Alt
Day - 6	During T.V. manufacturing radio frequency testing involves measuring the amount of electromagnetic radiation.	Testing R.F	Alt

WEEKLY REPORT

WEEK - 6 (From DI to DI)

Objective of the Activity Done:

Detailed Report:

Aging in power on condition.

Aging is an important process in T.V. manufacturing that involves testing the T.V panels and components to ensure they quality. In the aging process, the T.V panels and components are subjected to various such as temperature and humidity variation, to simulate real world usages conditions. This helps to detect any issues that may arise over time and ensure that the T.V. are durable and reliable.

The aging process can also helps to improve the overall quality of the T.V. sets by identifying and correcting any defects during the testing process. manufacturing can reduce the likelihood of customer complaints and returns overall. The aging process is a crucial step in TV manufacturing that helps to ensure that the products are of high quality reliable and meet customer expectations.

ACTIVITY LOG FOR THE SEVENTH WEEK

DAY & DATE	BRIEF DESCRIPTION OF THE DAILY ACTIVITY	LEARNING OUTCOME	Person In-charge Signature
Day - 1	White balance is a checking of T.V pannel screen.	The process of w.b stage	slt
Day - 2	In this stage the w.B means that it is colour analyser of the T.V.	w.B is an colour analyser	slt
Day - 3	A small device. especially an electrode. used for measuring, testing the T.V	The white balance having the 410 probe.	slt
Day - 4	410 probe the colour R,G,B The path runs checking to T.V screen.	Checking of probe with different colours.	slt
Day - 5	If any abnormal colours like (black, blue, white) TV's can't pass in w.B stage	TV's passing stage	slt
Day - 6	finally the tv's are checking with usb cable (usb(universal serial bus))	Final checking with usb.	slt

WEEKLY REPORT

WEEK - 7 (From Dt..... to Dt.....)

Objective of the Activity Done:

Detailed Report: TV White Balance Adjustment

White balance is an important stage in TV manufacturing as it ensures that the colours displayed on the screen are accurate and consistent. White balance is the process of adjusting the colour temperature of a display under the lighting conditions of the environment where it will be used.

During the manufacturing process, technicians use specialised equipment to measure the colour temperature of the screen and make adjustments to the red, green and blue colours to ensure they are displayed accurately. This process is typically performed at the factory, but some TVs also include user controls for adjusting in a room.

Without proper white balance, colours may appear too warm, distracting and make it difficult to accurately assess image quality.

ACTIVITY LOG FOR THE EIGHTH WEEK

DAY & DATE	BRIEF DESCRIPTION OF THE DAILY ACTIVITY	LEARNING OUTCOME	Person In-charge Signature
Day - 1	The back cover of the T.V is usually made of plastic or metal	The Back cover Preparation and passing Back cover	Alt
Day - 2	Closing of unwanted holes with Black taps to protect the T.V with dust.	Closing of holes with wing of tap.	Alt
Day - 3	Attaching of clips to the Back cover for inserting of motherboard.	Fixing clips in Back cover	Alt
Day - 4	checking the back cover with like scratches pointing problem and Bends.	checking the damages in Back cover	Alt
Day - 5	Cleaning the back cover will be cleaned with specific liquid all 3 sides & pressure to remove dust	Cleaning of Back cover with air	Alt
Day - 6	The Back cover will be cleaned with specific liquid all 3 sides except bottom.	Cleaning the cover with liquid.	Alt

WEEKLY REPORT

WEEK - 8 (From Dt..... to Dt.....)

Objective of the Activity Done:

Back cover fixing process

Detailed Report:

The back cover of the T.V is usually made of plastic or metal. It ensure that the components inside the T.V are properly protected and served. The back cover is first inspected for any defects or damage. The surface of the back cover is cleaned to remove any dust or debris the could affect the adhesion of the adhesive tape or screws.

The adhesive tape is applied to the inner edge of the back cover to ensure that the adheres firmly to the T.V frame. In addition to the adhesive tape screws may also be used to secure the back cover to the TV frame the screws are inserted into pre drilled holes on the back cover. cleaning the back cover of a T.V. The solution typically consist of a mixture of water and mild detergent. The solution should be mixed according to the manufacturer's instructions, and in a clean container.

ACTIVITY LOG FOR THE NINTH WEEK

DAY & DATE	BRIEF DESCRIPTION OF THE DAILY ACTIVITY	LEARNING OUTCOME	Person In-charge Signature
Day - 1	Moving of Back cover to Input stage of LCM (Liquid crystal module)	moving back cover into LCM	alt
Day - 2	Scanning Back cover for checking serial number to know that the Back Cover is Pass or fail.	Scanning Back cover Bar code	alt
Day - 3	Scanning of Led Light Bar and it will be linked to specific Bar code of Back cover.	Scanning of LED Light Bar's	alt
Day - 4	Sticking of Led Lights to Back covers by using glue	Sticking of LED Bars	alt
Day - 5	Tapping of LED Bars for safety purpose and stiffness.	Tapping of LED Bars	alt
Day - 6	Fixing of wires to the LED Bars for power supply.	Fixing of wires	alt

WEEKLY REPORT

WEEK - 9 (From Dt..... to Dt.....)

Objective of the Activity Done:

process of input stage in LCM

Detailed Report:

In this week we work in the one of the main manufacturing process of LCM stage (Liquid crystal module), in LCM stage the room was fully protected from dust and also fully AC cooler. on LCM they are three stages Input, open cell and output stage first we are learn about the Input stage. In LCM In this stage first scanning of Black cover checking serial number to know the particular Black cover is pass or fail in before stage. Then scanning of L.B.D Light Bar. that each LED Light Bar consist of 5 LED Lights and the light Bar are linked to specific Bar Code of the Black cover. The Light Bar's was fixed in the Black cover with using of glue, and then connecting electric wires to the light Bar's for power supply.

ACTIVITY LOG FOR THE TENTH WEEK

DAY & DATE	BRIEF DESCRIPTION OF THE DAILY ACTIVITY	LEARNING OUTCOME	Person In-charge Signature
Day - 1	Changing of Back cover into another conveyor on top of Ballot	Passing Back cover to another line	Alt
Day - 2	placing of Back light sheet on top of LBB Bar	fixing of LED Back Light sheet	Alt
Day - 3	Fixing supporters in the Back cover for the screen protection.	fixing of supporters	Alt
Day - 4	screwing the supporters for stiffness with machine	screwing of supporters	Alt
Day - 5	Final checking of Back cover in LCM input side	final checking	Alt
Day - 6	Passing of Back covers from LCM input to open cell in LCM.	Passing of Back cover to open cell in LCM	Alt

WEEKLY REPORT

WEEK - 10 (From Dt..... to Dt.....)

Objective of the Activity Done:

placing of Back light sheet

Detailed Report:

This week also continue in the same stage for some more process in the stage. placing of Back light sheet on top of LED Bar fixing supporters in the back cover for the display screen protection and screwing the supporters for stiffness with the help of screwing machine.

In the case of a liquid crystal display (LED) TV the input stage would involve receiving the various components such as the LED panel, backlight circuit boards power supply and other hard ware each components would undergo a series of test and inspection to ensure that they meet the required specifications and quality standards.

once the components pass inspection they would be assembled into the TV set and undergo further quality checks and testing.

The input stage as it sets the foundation for the quality and reliability of the finished product.

ACTIVITY LOG FOR THE ELEVENTH WEEK

DAY & DATE	BRIEF DESCRIPTION OF THE DAILY ACTIVITY	LEARNING OUTCOME	Person In-charge Signature
Day - 1	Preparing of white sheet for the purpose of brightness of T.V screen	Preparing of white sheets	MT
Day - 2	Checking of Black Back lights for any damages in light	checking of LED Light Bay	MT
Day - 3	Fixing of whit sheet and also checking that for any damages	Checking of white sheet damages. dust, Black dots.	MT
Day - 4	While cleaning the whit sheet by using vacuum cleaner	cleaning of white sheet	MT
Day - 5	The open cell can checked for any damages with help of Led light table.	Testing open cell	MT
Day - 6	Fixing of open cell on top of Back cover	Fixing of open cell	MT

WEEKLY REPORT

WEEK - 11 (From Dt..... to Dt.....)

Objective of the Activity Done:

Back light checking in LCM

Detailed Report:

This week conduct the program in open LCM that Backlight checking in TV manufacturing. In a typical LCD T.V manufacturing process. The backlight unit is assembled separately from the display panel. The backlight unit consists of a series of light emitting diodes (LED) or cold cathode fluorescent lamps (CCFLs) arranged in a specific pattern provide the required illumination for the display panel.

During the backlight checking process. The assembled backlight unit is connected to a power source and undergoes a series of tests to check for defects such as dead or dim pixels uneven brightness, and color balance. This process may be automated using specialized equipment or performed manually by trained technicians. The backlight has been checked and passed inspection it is then mounted onto the display panel and undergoes further testing to ensure that the TV product.

ACTIVITY LOG FOR THE TWELFTH WEEK

DAY & DATE	BRIEF DESCRIPTION OF THE DAILY ACTIVITY	LEARNING OUTCOME	Person In-charge Signature
Day - 1	Removing of double tap cover under the open cell to fix it	Removing of double tap cover glas cut	MT
Day - 2	Routing the display panel with roller in 3 sides of panel.	Routing of panel for stiffness	MT
Day - 3	Removing of white cover in panel for the scratches.	Removing of cover	MT
Day - 4	The 4 sides of the panel will tapped for some more support.	Tapping of 4 sides of the T.V.	MT
Day - 5	In the panel that open cell can connected to ffe to connect the main board.	Fixing ffc to open cell	MT
Day - 6	Capping of Browning in panel for protecting from electric waves.	Tapping of Browning.	MT

WEEKLY REPORT

WEEK - 12 (From Dt..... to Dt.....)

Objective of the Activity Done:

Fixing open cell and FFC

Detailed Report:

The open cell process involves the assembly of the liquid crystal layer and color filters onto a glass substrate forming the LCD panel. The LCD panel is then tested for defects such as dead pixels or color balance issues, and if necessary repaired or discarded.

once the LCD panel passes inspection it is shipped to a TV assembly plant where it is mounted onto a back plane which includes the circuitry for controlling the individual pixel of the display. This process is known as the closed cell process.

FFC (Flexible flat cables) are thin, flat ribbon-like cables that are used to connect various components within a TV, such as the LCD panels control board backlight, and other hard work components. They are commonly used in LCD TV's because of their flexibility high-density connector options and ability to transmit signals over longer distance than other cable types.

ACTIVITY LOG FOR THE THIRTEENTH WEEK

DAY & DATE	BRIEF DESCRIPTION OF THE DAILY ACTIVITY	LEARNING OUTCOME	Person In-charge Signature
Day - 1	Fixing of plastic bar under the T.V Panel with the help of screwing.	Fixing of plastic Bar	alt
Day - 2	Dark room:- passing of panel into dark room for checking of panel.	Passing of Panel	alt
Day - 3	Different types of problems in panel. Black dots white dots, brown dots Ghost images Problems	Damages in Panel	alt
Day - 4	The Fixing Ffc are checked In dark room with System.	FFC checking	alt
Day - 5	The panels are final scanning that the panel is properly made or not	LCM output scanning	alt
Day - 6	that the pass panels are transfer to F.A line and some panels are stored.	storing of Panels in trallies.	alt

WEEKLY REPORT

WEEK - 13 (From Dt..... to Dt.....)

Objective of the Activity Done:

The process of Dark room checking

Detailed Report:

During the dark room checking process The T.V is placed in a specially designed dark room, where the ambient lighting is controlled and minimized. The T.V is then connected to signal generator, which displays various test patterns and images on the screen. Technicians then examine the T.V screen for any defects such as pixel defect color banding or backlight bleeding. They also check for uniformity of brightness and color across the screen and the ability of the T.V to display deep blacks and accurate color in low light conditions.

The dark room checking process is essential for ensuring that the TV is capable of delivering a high-quality viewing experience particularly for movies or TV shows with dark or dimly lit scenes. Any defects or issues with the display can result in a poor viewing experience and customer dissatisfaction.

ACTIVITY LOG FOR THE FOURTEENTH WEEK

DAY & DATE	BRIEF DESCRIPTION OF THE DAILY ACTIVITY	LEARNING OUTCOME	Person In-charge Signature
Day - 1	In F.A Line the first process is Panel inspection and M.B. fixing and FATVSN scanning	M.B Preparation in F.A Line	st
Day - 2	FFC assembled and Back cover assembling fixing of connectors	IR preparation & speaker wire prepare and self: Preparation	st
Day - 3	Testing the Panel & fixing m pot and it is tested with USB	USB Testing	st
Day - 4	Back cover fixing & moved to scanning section.	Scanning of Back cover	st
Day - 5	The scanning section the scanning converge will take 10 minutes.	Time taken to scan Back cover	st
Day - 6	speakers are tested in this stage with different type of sounds.	Testing of speaker	st

WEEKLY REPORT

WEEK - 14 (From Dt..... to Dt.....)

Objective of the Activity Done:

Detailed Report: process of PA (final Assembly) stage

FA (final Assembly) stage in TV manufacturing refers to the final step in the production process where all the individual components are assembled together into a finished TV product.

During the FA stage, the LCD panel, backlight unit, power supply, control board and other hardware components are assembled into a TV chassis. The TV chassis is then inspected for defects and undergoes various tests and checks to ensure that all the components are okay. The power supply provides the necessary voltage and current to the TV's internal components. It is typically assembled into the TV chassis during the stage. The control board is the main processing unit of the TV, responsible for controlling the individual pixels on the LCD panel and communicating with other internal components.

ACTIVITY LOG FOR THE FIFTEENTH WEEK

DAY & DATE	BRIEF DESCRIPTION OF THE DAILY ACTIVITY	LEARNING OUTCOME	Person In-charge Signature
Day - 1	In this stage Dot Inspection and HMR testing	Dot Inspection	Alt
Day - 2	In This process Lan & wifi are tested with specified System R.F part testing	Lan & wifi testing	Alt
Day - 3	Resetting the panels After being checked the panel	Reset the program in panel	Alt
Day - 4	MRP is sticker are fixed and they will do on final inspection of T.V	MRP scanning & final inspection	Alt
Day - 5	The packing of T.V's with accessories like T.v stand remotes and wall screws	Packing of T.V's	Alt
Day - 6	After fining of T.V It will be exported to different cities & some other countries.	Export	Alt

WEEKLY REPORT

WEEK - 15 (From Dt..... to Dt.....)

Objective of the Activity Done:

Detailed Report:

Input output ports and Exporte

Input output ports The ports like such as HDMI, USB and ethernet ports are typically installed into the TV chassis during the FA stage. The speakers are typically built into the TV chassis during the FA stage, providing the audio output for the T.V.

The stand or mount is used to support the TV and is typically attached to the TV chassis during the FA stage. The parts used in the FA stage of TV manufacturing are critical for assembling.

In the packing stage also includes the additional features or accessories, like T.V stand remote and some other screws in it exporting.

Dixon Technologies has collaborated with Thirupathi Group to manufacture and export electronics products to various countries. The collaboration aims to leverage Dixon's expertise in electronics manufacturing and Thirupathi's expertise in global textile exports to expand their market reach.

CHAPTER 4: OUTCOMES DESCRIPTION

Work environment :

- * Learn to appreciate work and it's functions in the economic.
- * Explore career alternatives prior to graduation.
- * Integrate theory and practices.
- * Assess interest and abilities in there field of study.
- * Develop communication, interpersonal and other critical skills in the job interview process.
- * Build record of work experience.
- * Acquire employment contacts leading directly to full time job following graduation from college.
- * Identify, write down, and carry out performance objectives (mutually agreed upon by the employer)
- * Able to acknowledge and account for diversity in the work place, and advocate for equitable practices, justice, and the full inclusion of historically marginalized communities.

Real time technical skills acquired :

- * Communication skills.
- * Experience of work
- * Team work skills.
- * Soft ware skills.
- * Critical Thinking & problem solving skills
- * Project management skills.
- * Time Management.
- * Artificial intelligence.

Managerial skills acquired :

When it comes to selecting students for their internship programs, employers have a set of five competencies that are crucial for students to process. In terms of skills development, these are also among the skills employers and helping their interns to build during the students' internships.

- * Information processing
- * Team work
- * planning, prioritizing
- * Decision making
- * Verbal communication
- * problem solving

Students and supervisors also rated each individual soft skills significantly higher at the end of the internship compared to the beginning of the internship. The largest difference between pre-internship and post-internship soft skills were related to communication.

Supervisors also saw their interns make gains on the initiative scale, including "Logically dissecting a problem", approaching a problem independently and requesting increased responsibility. Management or managerial skills fall into three basic categories: Technical, human relations and conceptual skills.

Communication skills :

Communication is the act of conveying meaning to another person using mutually understood signs & semiotic rules

⇒ The sender is the person who sends the message
⇒ The message is the information to be conveyed.
⇒ The channel of communication is the manner in which.

⇒ The message is sent: speaking, writing, video, audio, emails.

Asking colleagues or supervisors for feedback on my communication skills and work to improve areas that need development six ideas to help you communicate more effectively in internship.

1. Volunteer to give a presentation.
2. Ask to host a team meeting.
3. Seek feedback from your peers as well as your manager.
4. Practise your "small talk" at informal times.
5. Reach out to those in a similar situation.
6. Keep on learning and practising.

This is something that is worked on during your "Worked Integrated Learning program" to help you develop and grow these skills just in time for your internship. It's common knowledge that the best leaders are excellent and highly effective communicators.

Enhancement of abilities in group discussions, participation in teams, contribution as a team member, leading a team/activity:

In this organization there are some discussion and meeting held weekly once, where we discuss about the financial growth and profit and losses in each and every aspect of Showroom.

Our owner in the workshop takes the leadership and explained how to deal with problem and acquiring some solution through the skills leadership which we learned from this internship.

I gained some leadership qualities and leading motivating the team to fulfill the requirements of the clients basis on their needs. I used to manage the team and also the workshop in the absence of the owner or workshop manager.

I went to advertising at the time. I was a team member and learned some behavioral analysis of customer who come for enquiry and I was thought them or our team to that with customer with policy and also with respectivity.

Designers are responsible for creating the overall look and feel of the TV, as well as the layout of the components and internal hardware. They work closely with engineers to ensure that the design can be manufactured within the required specifications.

Technological developments observed :

TV manufacture have focused on developing new technologies to improve the picture quality, sound quality and overall user experience. Some of the notable advancements in TV technology.

OLED (Organic Light Emitting Diode) TV's offer superior picture quality compared to traditional LED TV's with deeper blacks, brighter whites and more vivid colours. 4K and 8K resolution these high resolution displays offer incredibly sharp and detailed images, making them ideal for watching movies, sports, and gaming.

HDR (High dynamic Range) technology allows for a wider range of colours and contrast, making the image more vibrant and lifelike.

Smart TV's are internet-connected devices that allow users to stream movies and TV shows, browse the web and use apps directly on their TV.

Many modern TV's comes with built in voice control, allowing users to navigate menus and search for content using voice commands. The technological advancement that have been made in TV industry as technology continues to evolve, we can expect to see even more exciting developments in the years to come.

Student Self Evaluation of the Short-Term Internship

Student Name: NALLABALLE YESWANTH

Registration No: 216030052012

Term of Internship:

From: 01/02/2024

To: 01/05/2024

Date of Evaluation:

Organization Name & Address: DIXON TECHNOLOGIES, TIRUPATI,
ANDHRA PRADESH.

Please rate your performance in the following areas:

Rating Scale:

Letter grade of CGPA calculation to be provided

1	Oral communication	1	2	3	4✓	5
2	Written communication	1	2	3	4✓	5
3	Proactiveness	1	2	3	4✓	*5
4	Interaction ability with community	1	2	3	4✓	5
5	Positive Attitude	1	2	3	4✓	5
6	Self-confidence	1	2	3	4✓	5
7	Ability to learn	1	2	3	4✓	5
8	Work Plan and organization	1	2	3	4✓	5
9	Professionalism	1	2	3	4✓	*5
10	Creativity	1	2	3	4✓	5
11	Quality of work done	1	2	3	4✓	5
12	Time Management	1	2	3	4✓	5
13	Understanding the Community	1	2	3	4✓	5
14	Achievement of Desired Outcomes	1	2	3	4✓	5
15	OVERALL PERFORMANCE	1	2	3	4✓	*5

Date:

Signature of the Student

Evaluation by the Supervisor of the Intern Organization

Student Name: NALLABALLE YESWANTH

Registration No: 216020054012

Term of Internship:

From: 01/02/2024

To: 01/05/2024

Date of Evaluation:

Organization Name & Address: DIXON TECHNOLOGIES , TIRUPATI

**Name & Address of the Supervisor
with Mobile Number**

Please rate the student's performance in the following areas:

Please note that your evaluation shall be done independent of the Student's self-evaluation

Rating Scale: 1 is lowest and 5 is highest rank

1	Oral communication	1	2	3	4	5
2	Written communication	1	2	3	4	5
3	Proactiveness	1	2	3	4	5
4	Interaction ability with community	1	2	3	4	5
5	Positive Attitude	1	2	3	4	5
6	Self-confidence	1	2	3	4	5
7	Ability to learn	1	2	3	4	5
8	Work Plan and organization	1	2	3	4	5
9	Professionalism	1	2	3	4	5
10	Creativity	1	2	3	4	5
11	Quality of work done	1	2	3	4	5
12	Time Management	1	2	3	4	5
13	Understanding the Community	1	2	3	4	5
14	Achievement of Desired Outcomes	1	2	3	4	5
15	OVERALL PERFORMANCE	1	2	3	4	5

Date:

Signature of the Supervisor

PHOTOS & VIDEO LINKS

(i) outside and parking view of Dixon company

(ii) working of employees in the respective seats in the sheds with aprons & safety precautions

(iii) Aging section in the sheds having high Electricity.

(iv) Testing of TV panel incase of Any damages like dots, Bubbles, Scratches and v-lines.

(v) checking of back panel inspection and ports at the Testing phase

(vi) Assembling of speakers, Dr's, mother boards at input stage.

Internal & External Evaluation for Semester Internship

Objectives:

- Explore career alternatives prior to graduation.
- To assess interests and abilities in the field of study.
- To develop communication, interpersonal and other critical skills in the future job.
- To acquire additional skills required for the world of work.
- To acquire employment contacts leading directly to a full-time job following graduation from college.

Assessment Model:

- There shall be both internal evaluation and external evaluation
- The Faculty Guide assigned is in-charge of the learning activities of the students and for the comprehensive and continuous assessment of the students.
- The assessment is to be conducted for 200 marks. Internal Evaluation for 50 marks and External Evaluation for 150 marks
- The number of credits assigned is 12. Later the marks shall be converted into grades and grade points to include finally in the SGPA and CGPA.
- The weightings for Internal Evaluation shall be:
 - Activity Log 10 marks
 - Internship Evaluation 30 marks
 - Oral Presentation 10 marks
- The weightings for External Evaluation shall be:
 - Internship Evaluation 100 marks
 - Viva-Voce 50 marks
- The External Evaluation shall be conducted by an Evaluation Committee comprising of the Principal, Faculty Guide, Internal Expert and External Expert nominated by the affiliating University. The Evaluation Committee shall also consider the grading given by the Supervisor of the Intern Organization.
- Activity Log is the record of the day-to-day activities. The Activity Log is assessed on an individual basis, thus allowing for individual members within groups to be assessed this way. The assessment will take into consideration

the individual student's involvement in the assigned work.

- While evaluating the student's Activity Log, the following shall be considered -
 - a. The individual student's effort and commitment.
 - b. The originality and quality of the work produced by the individual student.
 - c. The student's integration and co-operation with the work assigned.
 - d. The completeness of the Activity Log.
- The Internship Evaluation shall include the following components and based on Weekly Reports and Outcomes Description
 - a. Description of the Work Environment.
 - b. Real Time Technical Skills acquired.
 - c. Managerial Skills acquired.
 - d. Improvement of Communication Skills.
 - e. Team Dynamics
 - f. Technological Developments recorded.

INTERNAL ASSESSMENT STATEMENT

Name Of the Student: NYESWANTH

Programme of Study:

Year of Study: 2021 - 2024

Group: DI BSc [MGS]

Register No/H.T. No: 216030054012

Name of the College: GOVERNMENT DEGREE COLLEGE, RAJAMPET

University: YOGI VEMANA UNIVERSITY, KADAPA
